IMPORTANT NOTES

Mix colours

Mix colours have a unique colour effect. This distinctive yet subtle variation in colour allows you to create interesting and attractive distributions of shade. Its effect is particularly enhanced in the gloss range.

Laurel glazed tiles

Laurel tiles have a copper-based glaze which is prone to discolouration by very mild acids often found in the home, for example in lemon-scented soaps. To avoid this, wash them frequently with clean water only and immediately wipe them dry. Do not use Laurel tiles in wet areas such as showers, bath surrounds, basin splashbacks or kitchen sinks.

Triangular half tiles

Matching triangular half tiles provide a neat finish to tiles laid at 45 degrees, minimising the need for cutting.

Shading

The subtle variations in shade between tiles give a wonderful impression of depth to tiled areas. It is important, therefore, to spend some time to achieve the most pleasing distribution of shades before fixing tiles.
