

CERAMIC

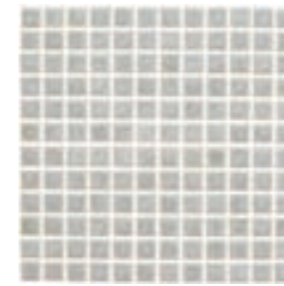

Ceramic mosaics have distinct advantages over their natural counterparts. The quality of the material is considerably more uniform. So too are the colour values. Most important of all perhaps, in a lifetime of use, is that they are easy to maintain.

Aegean mosaics in this range contain colour mixtures which have "burst" during their firing to create miniature works of natural art which, sufficiently enlarged and framed, would look at home on the walls of the Tate Modern.

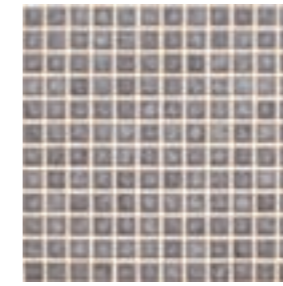

Andros, Siros & Greek Key Andros

AEGEAN MOSAICS 23MM (7/8")

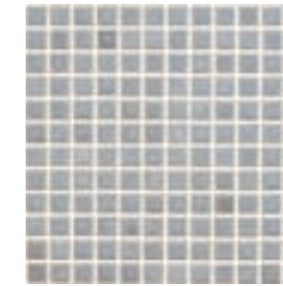

Fine, high quality ceramic mosaics with a deep, wet-look and 'natural' mineral patterning, where no two pieces are the same and the rich colour-mixes seem to burst from the centre of each small masterpiece. Where heat and water come together in your home, a practical yet stylish solution is required. Around a relaxing bath, busy kitchen or a quick shower, nothing expresses individuality better than mosaics.
